SUBJECT: Formal Dispute of Infractions and Notification of Hostile Conduct Affecting Medically Vulnerable Resident

To Ownership / Corporate Oversight:

This document serves as a formal dispute of the recent infractions issued to Apartment 107 and provides official notification of escalating hostile conduct directly impacting the health and safety of a medically vulnerable resident, Ms. Lisa A. English (Apartment 107).

I. Dispute of Issued Infractions

A. Allegation of "Unauthorized Pet"

The animal in question, Gigi, is a trained service animal. Gigi is a service animal utilized by me, Cody Rice-Velasquez, and occasionally accompanies me while I am performing my duties as an agency-based caregiver. Service animals are distinct from pets and are exempt from pet permit requirements and associated fees under federal housing guidelines, including the Fair Housing Act and implementing regulations.

Formal Request: We require written confirmation that a service animal accompanying a caregiver will not be classified or processed as a pet for the purposes of lease compliance or fees.

B. Allegation of "Unauthorized Extended Stay"

The assertion that permitted guest limitations have been exceeded is factually incorrect. My presence has consistently remained within the parameters outlined in the lease agreement. We possess timestamped documentation and location records substantiating the precise arrival and departure times for verification.

Formal Request: We require a specific, written statement detailing the dates and the exact factual basis relied upon in determining that the allowable guest limits were surpassed.

II. Notification of Escalating Hostile Conduct

Ms. English is oxygen-dependent, suffers from a chronic respiratory illness, and is currently under palliative care management. It is medically established that acute stress is a significant exacerbating factor for her Chronic Obstructive Pulmonary Disease (COPD).

In recent weeks, Mr. Miguel (Apartment 105, identified as a maintenance employee) has engaged in a pattern of escalating hostile conduct, frequently occurring immediately following our entry or exit from the premises:

- Initiation of unsolicited hallway confrontations regarding alleged lease matters.
- Repeated instances of forceful door slamming immediately subsequent to verbal exchanges.

- **Escalation Following Explicit Warning:** This conduct has intensified even after being informed that it was triggering severe respiratory distress.
 - On one recorded occasion, after Ms. English stated, "Please stop, I'm too sick for this," and I stated, "Please stop, sir, you're hurting her," Mr. Miguel reportedly responded, "I'm sick of you too," followed by repeated, forceful door slamming.
- **Use of Abusive Language:** Earlier this month, Mr. Miguel was recorded utilizing highly offensive and abusive language, including:
 - "Shut your fucking mouth."
 - "That's that bitch right here," while explicitly referencing Ms. English.

These actions persisted and intensified *after* Mr. Miguel was explicitly informed that his behavior was contributing to Ms. English's medical destabilization. These confrontations have directly preceded periods of acute respiratory distress requiring extended monitoring, and Ms. English required hospitalization during this period of escalating conduct. Continued exposure to this hostile environment presents a medically foreseeable and unacceptable risk of further severe respiratory decompensation.III. Formal Resolution Requests and Conclusion

While Ms. English remains in lawful residence, we formally request the following actions be taken immediately:

1. **Cessation of Confrontation:** Immediate written directive to Mr. Miguel prohibiting him from confronting or engaging Ms. English or her caregiver regarding alleged tenancy or lease matters within common areas.
2. **Basis for Infraction:** Written clarification of the factual basis for the guest-duration allegation (per Section I.B).
3. **Service Animal Acknowledgment:** Written confirmation that a service animal accompanying a caregiver will not be treated as a pet (per Section I.A).
4. **Preservation of Evidence:** The immediate preservation of all relevant hallway surveillance footage pertaining to these incidents.

For the avoidance of any misunderstanding, this correspondence does not constitute notice of termination of tenancy. Ms. English remains in lawful possession of Apartment 107, and all rights and legal defenses are expressly reserved.

Respectfully Submitted,

Cody Rice-Velasquez
Agency-Based Caregiver
